

1 Observe et colorie selon le code couleur.

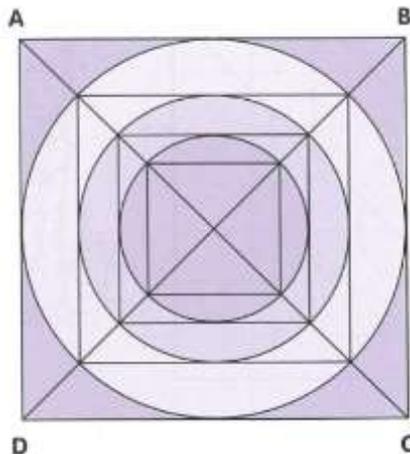

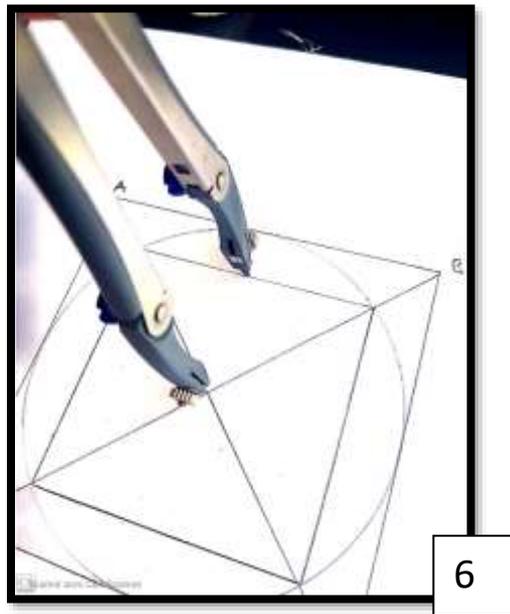

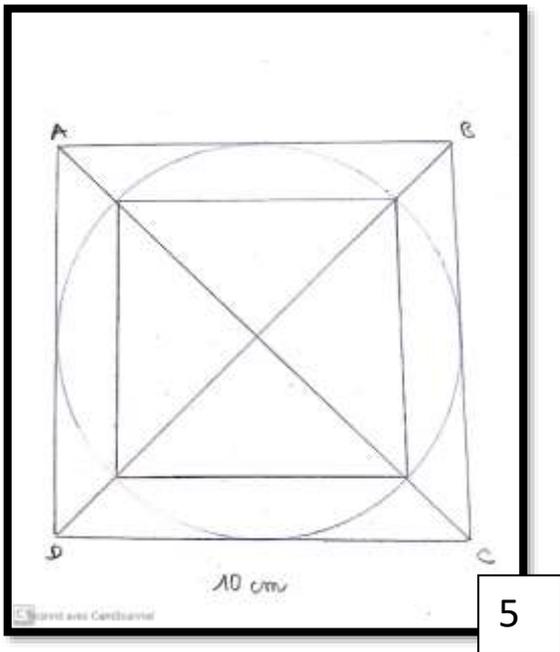

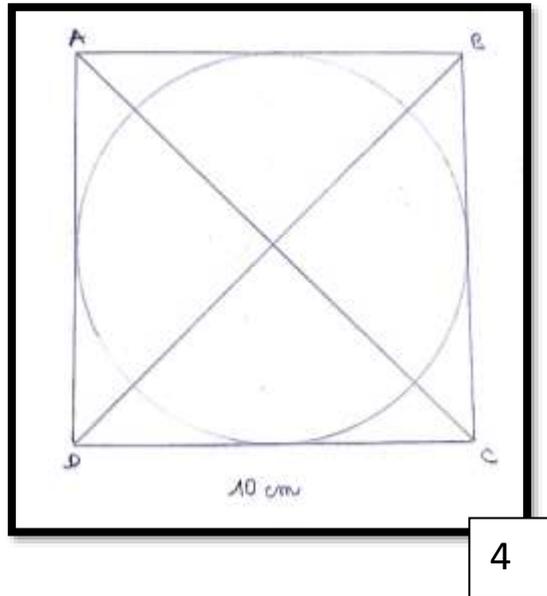

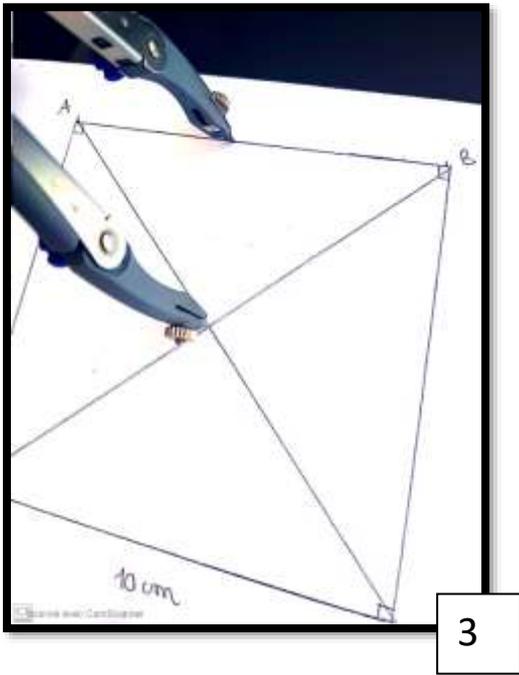

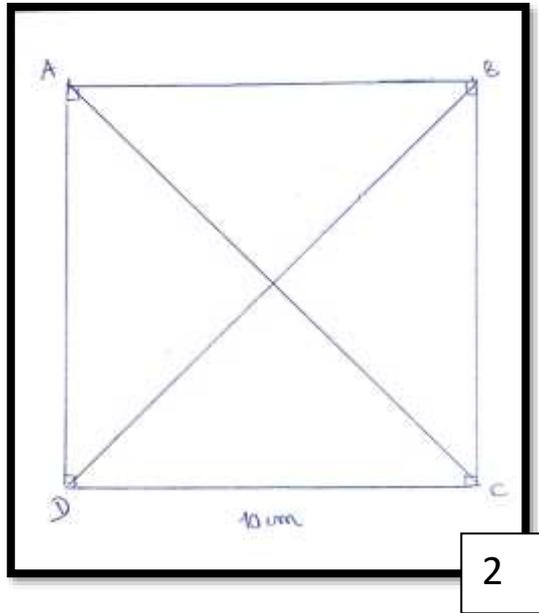

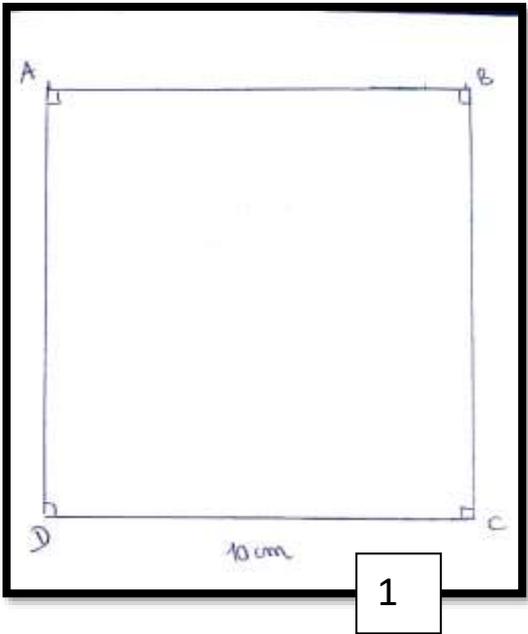

- bleu
- carré
- rose
- rectangle
- jaune
- parallélogramme
- orange
- triangle
- vert
- losange

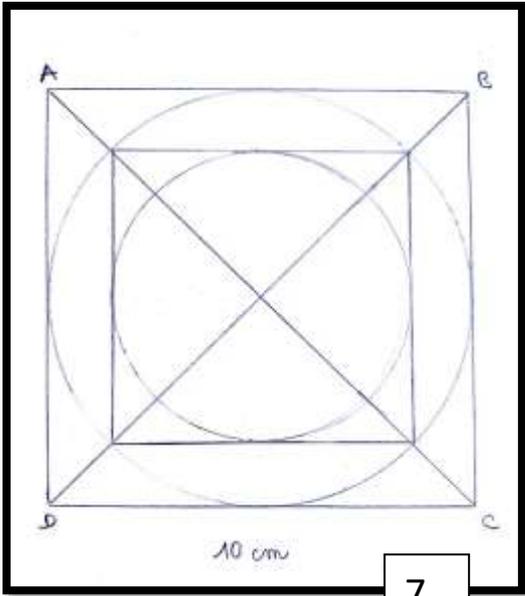

Ce carré est positionné comme nous avons l'habitude de voir le losange. Pourtant cette figure possède 4 côtés égaux et 4 angles droits. C'est donc un carré !

Cette figure est un simple quadrilatère, il n'a rien de particulier.

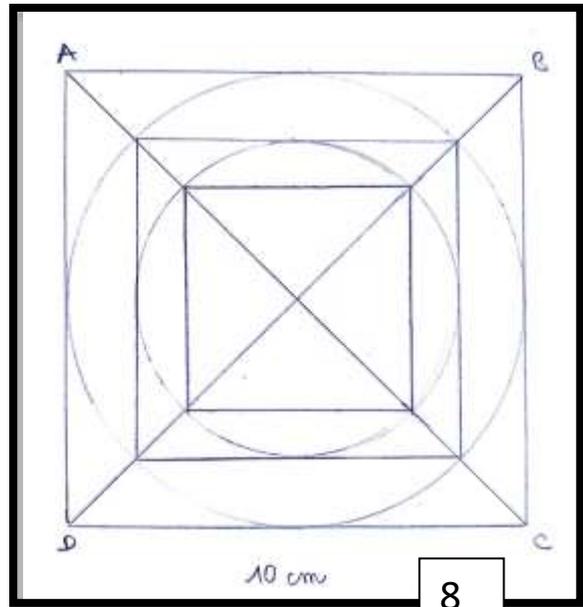

Exercice 3 : Reproduis la figure ci-dessus en prenant pour dimensions : un côté du carré = 10 cm.
